I have heard a lot of news lately about genetically engineered foods.

I AM STRONGLY AGAINST ALTERING FOODS FROM THE NORMAL STATE IN WHICH THEY GROW.

I urge you to require pre-market safety testing and environmental studies and mandatory labeling of all genetically engineered foods. Please keep these foods off the market in the meantime.

I fear our meddling in Mother Nature's domain could be a grave mistake. Please do not go down the road of telling the American people that everything is okay only to find out years later that it causes cancer or malnutrition or some other malady. Let's not repeat DDT and other national mistakes.

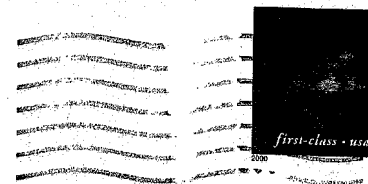

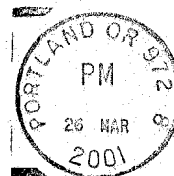

Respectfully,

Brett Sposito
